

Bostonian Shoes: Breaking In Shoes

How long does it take to break in new shoes? Honestly, how long? Some women believe that they are the only ones that suffer with breaking in new shoes. They believe that heels are the only type of shoe that requires numerous wearings before they are comfortable. This is completely untrue. Most shoes require a substantial period of wearing before they are broken in and can be worn comfortably. Stiffer shoes, such as men's dress shoes and some work boots, take quite a bit of wearing time before they are comfortable on your foot. Most shoes - but not all. Clarks Bostonian shoes are one of the very few exceptions to the rules.

About Clarks

Clarks is a company that began in England when two brothers decided to become entrepreneurs. They sold things that were made out of leather. Years after they began making fine blankets and other pieces, an ancestor of the original shop owners created Wallabees. Clarks Wallabees are shoes that are molded to fit your feet. They allow you to walk and immediately be in comfort. Absolutely no "break-in" time is needed when you're wearing Clarks Wallabees. Clarks knew that they had a winner on their hands and decided to branch out and create other types of shoes. They believed that, if they could make all shoes extremely comfortable, people's feet would be much happier.

Clarks Bostonians Shoes

Clarks knew that men needed to have comfortable dress shoes to wear, whether they wore them only on special occasions or every day to work in. The problem with men's dress shoes is that they are always severely stiff! They require a very long time to make comfortable, and if you're only wearing the dress shoes on special occasions, you may never get them broken in!

Clarks solved that problem with their Bostonian shoes. Bostonian shoes from Clarks have a First/Flex construction. This means that there is absolutely no break-in time needed to be comfortable wearing these shoes. Can you imagine sliding your feet into a pair of men's dress shoes and being instantly comfortable? This is no dream: this is Clark's Bostonian shoes.

Types of Bostonians

Clarks have a number of different types of Bostonian shoes that will fit your needs, no matter if you're wearing shoes to a wedding or to a business meeting. Take, for instance, the Bostonian Etna. This shoe is extremely comfortable, because not only does it have the Bostonian First/Flex technology, it is also a slip on shoe! This mildly polished shoe comes in both black and brown leather and can be worn in, or out of the boardroom.

The Bostonian Langley black leather shoe is perfect for dress occasions. It is an oxford that is made with supple leather uppers, a 2POD foot bed comfort insole, and the Bostonian First/Flex technology. This is truly the ideal shoe to have for dress occasions.

Clarks Bostonian shoes are meant to be for every man, whether he wears dress shoes every day, or just for special occasion. Nothing is more comfortable
