

## Mistakes I've made in my search for the Top Internet Businesses

In my 4 year adventure looking for the Top Internet Businesses, I have been relieved of a lot of cash and have made a little too.

Moving from business to business has caused me the most trouble. I would offer as a good piece of knowledge that you identify one business and work with it for about one year at a minimum before making any decisions to Change businesses. Don't get lured into joining any other business or programs. Stay focused. This is the top way that people get into trouble and lose money.

Two thing that you need to posse is persistence and patience if you want to succeed in your quest to have a top internet business. Never give up, Never give up, never give up is the advice that I would give to anyone.

Try doing a Google search before you join any Top Internet Businesses. Look for all the benefits that you can find and also any problems that can identify that will help you to make a good judgment on should you be involved with this program. This has saved me a lot of time and money too.

Do as much research as you can, as it will save you a lot of money and time that you will waste in the long run. If you do this, you will now be able to use the money that you would have wasted from moving to a new program, on advertising and marketing the business that you feel comfortable with.

Losing money in this business is what a lot of people are doing. Don't follow in the footsteps that many people who have not read this information are doing everyday. You can learn from mine and other people's mistakes. Use your money to build your business.

Branding yourself is the next key to success in this business. Get your name out there in front of as many people as you can so that people will know who you are and want to buy what every you are selling.

Don't just start spending money on advertising yourself or your products and services. Look for free or inexpensive ways to brand yourself. Use article marketing, classified advertisements, safelist and traffic exchanges to name a few.

If you do have a few dollars to spend, you can put out the money needed for making money online into buying solo ads or get your own domain name, hosting company, autoresponder and create a splash page to build a list.

You will have to spend some time writing email follow-ups but this will pay off in the long run as you have to get your name in front of people about 5 or more time before they will buy from you. I had to learn this the hard way so please use this technique.

Look on your hard-drive to see if you have any product or ebooks that you have purchased that you have never used and give them away for free to the people who have sign-up through you splash page. This will make them think of you as a valuable resource where they can go to get everything they need to be successful.

I hope that you have learned some things from my mistakes so that you will not have to waste your time and money like I did.

Stay patient and persistent through your adventure of the Top Internet Businesses found on the Internet. You will reach all you goals in time!
